Q2 2026 rendering telemetry

Live engine metrics across every document profile, drawn directly through the Pro chart API — no external charting library.

4.2M	99.98%	52 ms	3
DOCUMENTS RENDERED	SUCCESS RATE	MEDIAN LATENCY	EDITIONS IN PRODUCTION

Render volume by document profile

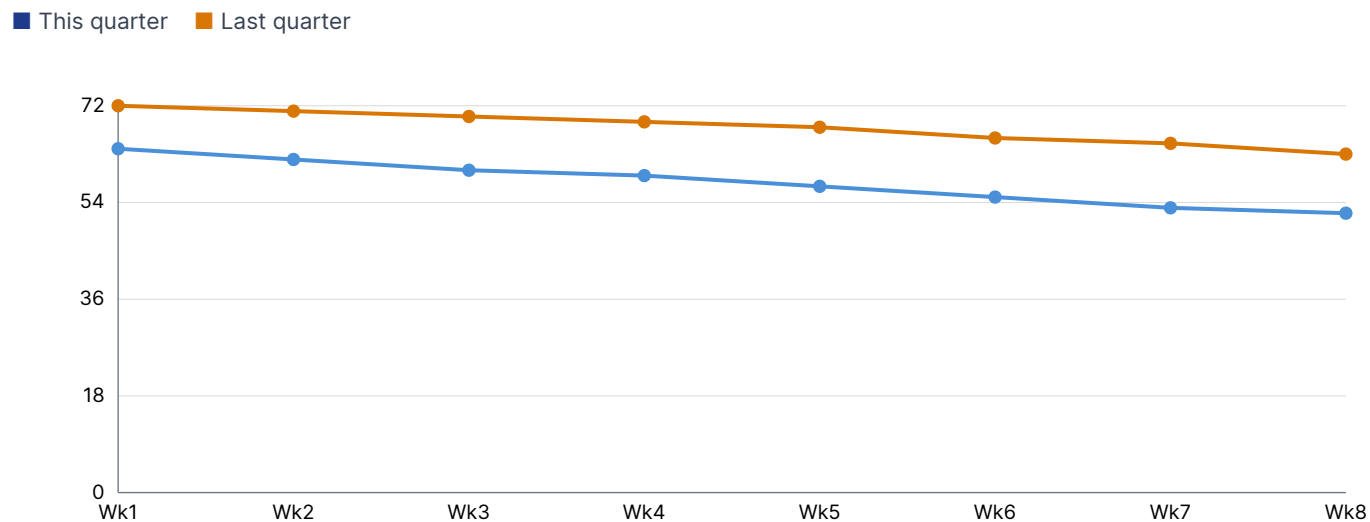

Documents rendered per profile this quarter, aggregated from production render telemetry (thousands).

Figures are illustrative sample data. All four profiles cleared 99.9%+ render success this quarter.

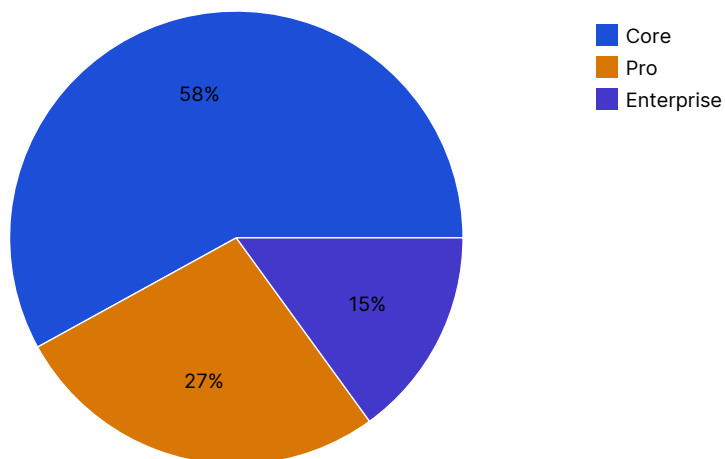

Latency trend, this quarter vs. last

Median render latency by week, current quarter compared with the prior quarter (milliseconds).

Edition mix by rendered volume

Share of this quarter's rendered documents by NextPDF edition.

Key findings

- **Enterprise** adoption grew to 15% of rendered volume as regulated workloads adopt PDF/A archival output.
- **Median latency** fell to 52 ms this quarter, a 14% improvement over the prior quarter.
- **Reports & dashboards** is now the second-largest profile by volume, trailing only invoices & statements.
